

THE VALUE OF EXPERIENCE

Syst-A-Matic, a full-service, build-to-print tool company in Meadville, PA, brings the value of experience to customer service and precision machining. With over 40 years experience in the tooling industry, Syst-A-Matic's skilled workforce is dedicated to proactive problem solving, on-time delivery and developing quality parts.

Identifying possible problems prior to machining parts is the company's goal while working on prototypes with their clients. This partnership between Syst-A-Matic's journeyman toolmakers and the client's designers not only results in a better product but also cuts lead time in the design and development process and improves delivery times.

"Syst-A-Matic also works with local third party vendors on some of the more specialized processes (such as certified welding, heat treating, painting, etc.) to ensure you receive a quality finished product every time" says Syst-A-Matic owner Ken Miller.

Syst-A-Matic's tooling and machining experience combines to create a valuable customer experience. As one client in the automotive industry said, "I quote and do business with Syst-A-Matic with good success. They hit the dates and are very competitive. No issue ever with quality, never have to call asking 'Where's my parts?'"

Syst-A-Matic's expertise and customer service makes them the ideal supplier for any parts development project. The company can deliver in a wide variety of essential services, including:

- Precision machining
- Welding
- Tool Making
- Laser Mark
- Wire EDM
- Reverse Engineering
- Prototyping
- Assembly
- Vertical Milling
- Precision Grinding
- Turning
