

**SYST-A-MATIC**  
TOOL & DESIGN

Good day,

My name is Tim Mullen, the Chief Operating Officer at SYST-A-MATIC Tool & Design, a full-service build-to-print manufacturing company, in Meadville Pennsylvania. Tooling, fixturing, components and assemblies are among the products made to our customers' designs. Small product runs are accepted.

My goal since joining SYST-A-MATIC in November 2022 has been to strengthen the company through sustainable growth and education.

New machines have been purchased by SYST-A-MATIC, existing equipment enhanced, and additional employees hired.

We have been successful in bringing in new customers as well as strengthening and reestablishing relationships with existing and past customers.

I am reaching out to you today in hopes of continuing our efforts.

If there is anything we can help you with, please contact me at: [tim.mullen@syst-a-matic.com](mailto:tim.mullen@syst-a-matic.com).

Thank you,

Timothy J. Mullen
